

Systems Analysis Branch/P&PS/OL  
WEEKLY STATUS REPORT  
Week of 28 February to 04 March 1983

I. Major Activities During the Past Week:

A. Support to OL:

STAT INFO (INFO Applications). The new version of the system was loaded on VM1 on 4 March. All commands are now operational. The ODP/SDD/ICSB staff have the responsibility to load and test all future versions from the HENCO Company. [redacted] (U)

II. General Items:

A. Support to OL:

STAT TRAINING. [redacted] attended the Basic Statistical Concepts course at CoC from 28 February to 4 March. [redacted] (U)

III. Problems:

A. Support to OL:

STAT FARS (Federal Automated Requisitioning System). Personnel in the Interdepartmental Support Branch/SD/OL are in the process of backing up all their files to tape in order to load all FARS data and programs to a new diskpack. This process is necessary due to hardware errors that surfaced during daily processing on the current diskpack. To backup and restore all files as well as prepare the diskpack is an involved and time-consuming process. Some minor problems that surfaced during the process have been taken care of. [redacted] (U)

IV. Upcoming Events:

None to report.
